

Example 3

My name

January 5, 2011

1 What's this?

This is our second document.

It contains two paragraphs. The first line of a paragraph will be indented, but not when it follows a heading.

50% of \$100 makes \$50. More special symbols are `&`, `_`, `{` and `}`.

Text can be *emphasized*. Besides being *italic* words could be **bold**, *slanted* or typeset in SMALL CAPS. Such commands can be ***nested***. See how emphasizing looks when nested.

The best place for downloading LaTeX related software is CTAN. Its address is <http://www.ctan.org>.

2 L^AT_EX resources in the internet

The best place for downloading LaTeX related software is CTAN. Its address is <http://www.ctan.org>.

Text can be *emphasized*. Besides being *italic* words could be **bold**, *slanted* or typeset in SMALL CAPS.

Such commands can be ***nested***.

See how **emphasizing** looks when nested.

We start small and big Large and bigger and gigantic!

3 using environments

A small example

This is just another illustrative example

4 creating my own commands

4.1 The T_EX Users Group

The T_EX USERS GROUP is an organization for people who are interested in T_EX or L^AT_EX

4.2 commands with arguments

Grouping by curly braces limits the *scope* of **declarations**

`ftp://linux.org`

`www.nick.com`

4.3 parbox

for small text boxes

TUG is an acronym. It means
T_EX Users group

	this par-		
	box is		
	aligned at		
	its bottom	center-	
text line	line	aligned	another
		parbox	parbox
			aligned at
			its top line

4.4 minipage

TUG is an acronym. It means
T_EX Users Group. ^a

^amy first footnote in a while

That was an environment, not a command. But they take optional arguments and arguments like a command.

4.5 manual hyphenation

TUG is an acronym. It means
T_EX Users group

can go `\{indivisible}` that has no break points so it will not hyphenate

or `\{mbox}` which disables all breaks

there is also the `hyphenat` package.

`\ladeeda`
